

# MSP BeDazzle™ Gloss Pressing Sheets

## Product Information Bulletin

### Product Description

Overlay **MSP BeDazzle™ Gloss Pressing Sheets** onto heat transfer images made with light-color, or dark-color heat transfer paper, to give them a highly glossed look. The resulting image reminds you of a glossy photograph. **MSP BeDazzle™ Gloss Pressing Sheets** work with light-color or dark-color heat transfer paper sold by Michigan Specialty Paper.

### Product Benefits

- MSP BeDazzle™ Gloss Pressing Sheets produce a shiny, highly glossed, photographic look.
- This product works with any inkjet, laser light or dark-color transfer paper.
- The resulting images are exceptional, in color and finish quality.
- MSP BeDazzle™ Gloss Pressing Sheets are easy to use.

### Product Applications

Overlay **MSP BeDazzle™ Gloss Pressing Sheets** onto an image to produce a shiny, highly

glossed finish. Gloss enriches colors, adding a fresh look to your projects. **MSP BeDazzle™ Gloss Pressing Sheets** are useful when used on light or dark garment transfer images. Use **MSP BeDazzle™ Gloss Pressing Sheets** instead of pressing paper, to transfer a dark-color heat transfer to garments. Use glossing sheets, as a second step, to add a gloss to any light-colored transfer images.

**NOTE:** Test this product with your equipment and materials, to insure you will achieve the desired results.

### Product Specifications

#### Stock Sizes:

Sheets: 8-3/4" x 11-1/4" and 11-1/4" x 17-1/4"

#### Custom Sizes

As special order

#### Packaging

8-3/4" x 11-1/4" size—available in 500, 100, 50, and 25 packs

### Product Pricing/Availability

Please call, at hours shown, for price and availability.

### Washing Recommendation

Wait 24 hours before using or washing garment for the first time. Turn garment inside out and machine wash in cold water using a mild detergent. Do not hand wash. Do not use fabric softener, bleach, or bleach alternative detergents. Do not leave garment in washer. Tumble dry garment using delicate setting or line dry. Do not dry clean. Do not iron directly on transfer area.

### For More Information

### Hours

Open Monday through Friday, 9:00 a.m. - 7:00 p.m., and Saturday, 9:00 a.m. - 1:00 p.m., Eastern time.

### MSP BeDazzle™ Gloss Pressing Sheets produce a shiny highly glossed finish on heat transfer images applied to t-shirts and fabrics.

Use **MSP BeDazzle™ Gloss Pressing Sheets** to produce a shiny highly glossed finish on heat transfer images. They work on light-color and dark-color fabrics. When using sublimation inks, the printed image may transfer onto the digital glossing sheet.

The entire image will have a gloss finish when you complete the steps shown. We suggest trimming the **MSP BeDazzle™ Gloss Pressing Sheet** to the shape of your image to avoid having a rectangle gloss over the entire image.

#### Instructions for applying gloss to opaque paper used for dark fabrics.

1. Print the heat transfer as instructed by the paper manufacturer. Peel off the release liner and place the printed transfer, image side up onto the fabric.
2. Place an MSP BeDazzle™ Gloss Pressing sheet, shiny side down, over the printed opaque transfer, instead of a pressing sheet.
3. Apply the opaque heat transfer, using time, temperature, and pressure settings recommended for your opaque transfer paper.
4. After pressing, remove garment from the heat press, and allow the garment to cool before removing the glossing sheet.

#### Instructions for applying gloss to heat transfer paper used for light fabrics.

1. Apply your image to the garment as instructed by the transfer paper manufacturer.
2. Peel off the backing paper at the end of pressing cycle.
3. Place the BeDazzle™ Gloss Pressing Sheet, shiny side down, over the printed transfer and press again for **ONLY 5 seconds**.
4. After pressing, remove garment from the heat press, and allow the garment to cool before removing the glossing sheet.

#### Can be used with:

Inkjet

Laserjet

Dark Colors

Light Colors

Heat Press

#### WASHING INSTRUCTIONS

Wait 24 hours before using or washing garment for the first time. Turn garment inside out and machine wash in cold water using a mild detergent. Do not hand wash. Do not use fabric softener, bleach, or bleach alternative detergents. Do not leave garment in washer. Tumble dry garment using delicate setting or line dry. Do not dry clean. Do not iron directly on transfer area.

#### STORAGE AND HANDLING OF TRANSFER PAPER

Store MSP BeDazzle™ Gloss Pressing Sheets in a cool dry area and do not remove the heat transfer fabric from plastic bag packaging until it is ready to use. Reseal plastic storage bag carefully after each use.

#### IMPORTANT

We thoroughly test each of our products on various substrates using different transfer equipment. However, it is impossible for us to duplicate all variables using all substrate and transfer equipment. Therefore it is essential that you test this paper prior to production using your equipment, methods, and substrate material. Heat presses vary in accuracy of time, temperature and pressure. User should conduct tests to determine best time and temperature for the intended process and equipment. Please keep in mind that the Seller's and Manufacturer's maximum obligation shall be to replace any paper that has proven to be defective. Neither the Seller nor Manufacturer shall be liable for any injury, direct or consequential, arising out of the use of, or inability to use this paper.
