MICHIGAN Specialty Paper

MSP BLUE BACK Heat Transfer Paper

FOR INK JET PRINTERS

MSP Blue Back heat transfer paper is designed for use in most inkjet printers for the transfer of light-colored garments. Using the latest coating technology, MSP Blue Back will lend the “softest hand” transfer in the marketplace! Along with the fantastic soft feel, other great features include excellent stretch-ability, durability and no need for the extra step of trimming around the image before transferring! Use as a hot or cold peel.

PRINTING:

1. Mirror the image.
2. Load the paper so that the image will appear on the coated side.
3. Paper should be fed into the copier or printer with the short dimension first (grain long).
4. Start with “Plain Paper” mode. Adjust to a heavier paper setting if necessary. **DO NOT OVER SATURATE PAPER.**
5. Trim away excess unprinted areas of the transfer.

TRANSFERRING:

Using a Commercial Heat Press

1. Place the transfer sheet face down on the substrate and press:
25-30 seconds at 375°F - 400°F using medium pressure
2. Can be peeled hot or cold.
3. Hand Iron instructions are on the next page.

For Use With:

Ink Jet

Heat Press

Hand Iron OK

White or Light Color

HEAT PRESS

TEMPERATURE 375°-400°

PRESSURE Medium

TIME 25 Sec. – 30 Sec.

WASHING INSTRUCTIONS:

Turn garment inside out and wash in cold water using a mild detergent, **do not use bleach** and machine wash ONLY. Dry on low heat setting. Apparel may be ironed directly on the transferred area.

STORAGE AND HANDLING OF MSP BLUE BACK TRANSFER PAPER:

Store MSP BLUE BACK Heat Transfer Paper in a cool, dry area and do not remove from carton or poly bag until you are ready to use.

HAND IRONING INSTRUCTIONS can be found on our website at:
www.michiganspecialtypaper.com/product-literature

IMPORTANT

We thoroughly test each of our products on various substrates using different transfer equipment. However, it is impossible for us to duplicate all variables using all substrates and transfer equipment. Therefore, it is essential that you test the paper prior to production using your equipment, methods, and substrate material. Heat presses vary in accuracy. Conduct tests to determine the best time and temperature to use with your equipment. Please keep in mind that the Seller's and Manufacturer's maximum obligation shall be to replace any paper that has proven to be defective. Neither the Seller nor the Manufacturer shall be liable for any injury, direct or consequential, arising out of the use of, or inability to use this paper.
