

ImageStix®

Removable and repositionable adhesive paper

Product Description:

ImageStix® is a removable and repositionable adhesive paper developed for commercial reproduction of promotional materials, craft projects, bumper stickers, scrap-book art or crazy sticker creations made on a home computer.

Repositionable paper is not new, but now it can be printed on using an ordinary laser or inkjet printer at home or in today's technologically advanced offices and factories. Anyone can design personalized bumper stickers, wall art or anything else that requires re-positioning using ImageStix® adhesive, repositionable paper.

ImageStix paper is a fantastic starting point for anyone looking for a creative sideline or business run from home. Create eye catching stickers and then sell them online using nothing more than the ImageStix paper and an ordinary PC.

ImageStix® can be removed and repositioned multiple times, making it extremely versatile.

It gives you beautiful copies of any design that can be placed on any smooth surface, then moved or repositioned at any time without leaving residue or damaging your image.

ImageStix is ideal for outdoor projects like bumpers or signs. It's waterproof, weather resistant and wrinkle-proof **. Its usefulness is only limited by your imagination.

ImageStix is a truly unique paper. There is nothing like it on the market.

Technical description:

ImageStix® is made of a rubber resin material specifically designed for use in inkjet & laser printers. Its semi-glossy surface produces a brighter, sharper image. ImageStix® has more longevity than paper and won't wrinkle as easy. It is designed, unlike traditional adhesive paper products, to be removed and repositioned for multiple uses.

Features and Benefits:

- Produces photo-quality, sharp colorful images.
- Use on both inkjet & laser printers.
- Self-adhesive, removable and repositionable.

- Water, steam and heat resistant.
- Leaves no residue when removed.
- Wrinkle-less: Can be stretched to remove any wrinkles which may occur.
- Soft & flexible, not rigid like paper.
- Much more durable than paper.

Product Specifications:
11 3/4 x 16 1/2" sheets

Packaging:
Packets of 10 sheets.

Product Pricing/Availability:
Please call or see web site.

NOTE:
Color may fade over prolonged exposure to direct sunlight or adverse weather.
