

Neenah Image Clip Laser Light

Transfer paper for Light-Colored Substrates.

Product Description:

NEENAH IMAGE CLIP Laser Light is a self-weeding heat transfer paper designed for the heat transfer of full color fuser oil or oil-less laser color copier or color laser printer images to light colored substrates. Neenah Image Clip Laser Light is ideal for cotton, 50-50 blends and polyester and leaves no polymer film windows. It has a soft hand and gives excellent results when transferring bright colors to t-shirts and light substrates (i.e., not intended for photographs).

Product Benefits:

- No Need to “weed” or Trim Around Image - Eliminates Unsightly Polymer Film Windows
- Hot Peel Applications from a Commercial Heat Press Only
- High Quality End Product with Great “hand”, Softness and Feel
- Manufactured by Neenah Papers Inc.
- Excellent Wash and Wear Durability.
-

Product Applications:

NEENAH IMAGE CLIP® Laser Light is a self-weeding soft hand

digital heat transfer paper. It is designed to print well in a majority of color laser copiers and printers with and without fuser oil. The Image Clip capability of this product allows for a crisp image with no plastic polymer window left around the image. It is an excellent alternative to screen printing. It has a quick dry time and because it's hot peel, it can be used in commercial print shops requiring a high productivity rate. It has excellent wash and wear durability and can be used on many light colored substrates including T-shirts, sweatshirts, mouse pads, caps, puzzles, pad folios, binders and more. There are no solvents employed so this is an environmentally friendly product.

Product Specifications:

Stock Sizes:

8.5” x 11” Sheets

Custom Sizes:

Some sizes not shown are available as special order.

Packaging:

8.5” x 11” sheets – available in 25, 50, 100 and 500 packs

Printer Compatibility:

Compatible with most newer technology color laser copiers and printers

NOTE: Due to the nature of this product some experimentation may be required to achieve the desired results.

Washing Recommendation:

We recommend you turn the shirt inside-out; use a delicate wash cycle, or wash by hand, in cold water with a mild detergent. Hang dry or in a dryer using delicate setting. Do not iron over transfer.

MICHIGAN Specialty Paper

NEENAH IMAGE CLIP® Laser Light Heat Transfer Paper

FOR LASER COPIERS OR PRINTERS

NEENAH IMAGE CLIP® Laser Light Heat Transfer Papers are designed for the heat transfer of full color images with fuser oil or oil-less laser color copiers or color laser printers to items such as T-shirts, handbags, mouse pads, leather articles, art papers, etc. NEENAH Image Clip™ Laser Light works well on cotton, 50-50 blends and polyester. There is no need to trim the paper. NEENAH IMAGE CLIP® Transfer Paper is self-weeding and leaves no background plastic polymer. Choose garments that have a tight weave.

PRINTING

1. Mirror the image.
2. Laser print using heavy paper setting to ensure fusing of the toners.
3. Load the red back printed imaging sheet so that the image will print on the coated side of the paper.
4. NEENAH IMAGE CLIP® LASER LIGHT Paper should be fed into the copier or printer with the short dimension first (grain long).

TRANSFERRING

Commercial Heat Press Only (No Hand Iron)

1. Press the imaged sheet (red printed back) to the transfer sheet (green printed). This will apply the transfer coating to the imaged area. Press using Teflon sheet to transfers for:
20 seconds at 210°F using heavy pressure
Separate the papers while still hot.
2. Press the treated imaging sheet (red print) face down onto the shirt or other substrate. Press:
20 seconds at 375°F using heavy pressure
Peel while still hot. Stretch Immediately. Some toner will remain on the transfer paper after peeling. This is normal.

For Use With:

Laser Printer/Copier Heat Press NO Hand Iron White or Light Color

1st PRESSING	
TEMPERATURE	210°
PRESSURE	Heavy
TIME	20 Sec.
2nd PRESSING	
TEMPERATURE	375°
PRESSURE	Heavy
TIME	20 Sec.

WASHING INSTRUCTIONS:

Turn garment inside out and wash in cold water using a mild detergent, **do not use bleach**. Dry on low heat setting. Do not iron directly on the transferred area.

STORAGE AND HANDLING OF NEENAH IMAGE CLIP® HEAT TRANSFER PAPERS: Store in a cool, dry area and do not remove from carton or poly bag until you are ready to use.

IMPORTANT

We thoroughly test each of our products on various substrates using different transfer equipment. However, it is impossible for us to duplicate all variables using all substrates and transfer equipment. Therefore, it is essential that you test the paper prior to production using your equipment, methods, and substrate material. Heat presses vary in accuracy. Conduct tests to determine the best time and temperature to use with your equipment. Please keep in mind that the Seller's and Manufacturer's maximum obligation shall be to replace any paper that has proven to be defective. Neither the Seller nor the Manufacturer shall be liable for any injury, direct or consequential, arising out of the use of, or inability to use this paper.
